## Market Overview

Indian equity indices put up stellar performance in January 2018. Strong domestic and global cues enabled benchmarks S&P BSE Sensex and Nifty 50 to rally 5.60% and 4.72%, respectively, in January 2018. Most S&P BSE sectoral indices ended higher in January 2018. S&P BSE IT (Information Technology) index was the top performer - up around 11.34% owing to encouraging earning numbers from some of the index majors. Banking stocks rallied amid reports that the government is considering raising the foreign investment ceiling in private banks to 100% and in public sector lenders to 49%. S&P BSE Bankex index advanced 7.38% in the month. The capital goods counter continued to see buying interest in January 2018; S&P BSE Capital Goods index rose around 6.43%. Buying in the metal counters continued amid rise in global metal prices; S&P BSE Metal index climbed around 3.27%. Among the laggards, auto stocks lost momentum on profit booking; S&P BSE Auto index fell 3.01%.

The 2018 Union Budget speech was in line with the market expectations on most count. The Finance Minister brought back the long term capital gain tax for investors. The tax regime has been introduced on prospective basis, thereby giving market participants ample time to adjust to the new regime. The budget also lays emphasis on rural economy and social sector. There were also reiterations related to infrastructure spending with emphasis on expansion of roads, railways and airport capacity. All these measures can benefit the economy, as various sectors gain from the implementation of budget announcements: rural consumption, infrastructure, and agriculture-related companies.
