

### Commentary on Equity Markets

The MSCI India Index started the month at 17.95 and closed at 18.12, increasing by 0.9% over the month. As per latest data, FIIs were net buyers in Equity with inflow of USD 0.33 Bn and in Fixed Income with inflow of USD 0.83 Bn. Domestic Institutions were net buyers in equities with net buying of USD 0.39 Bn in the month.

### Commodities and Inflation

NYMEX Crude Oil prices fell by ~10.8% from the previous month levels, ending at 45.41 per barrel; the prices were lower by ~24.8% yoy. LMEZ closed at 2801.1 lower by 3.7% over the month (lower by ~18.1% yoy). Gold prices closed at USD 1282.56/oz higher by ~4.9% over the previous month (lower by ~1.13% yoy). The USD Index fell by ~1.13% vs. other currencies over the month; over the year the USD Index was higher by ~4.4%.

November CPI at 2.33% came in lower than higher revised 3.4% in October tracking sharp fall in food prices (consecutive negative food inflation) and steep decline in retail fuel prices. November has exhibited lower global commodity prices (oil and food) and stronger INR. CPI print thus reflected comfort from these supply side pressures. Overall inflation has been moderating with subsiding cost push factors. Core inflation moderated to 5.73% vs 6.2% in October. Core inflation ex-Transport & Communication stood elevated at 6.1%. April-November 2018 core inflation and headline CPI have averaged 6.1% and 4% respectively. Headline rates are likely to remain sub 4% in the near term. Core inflation is likely to remain above 5%.

### Markets & Real Economy

October IIP at 8.1% came in higher than 4.5% in September gaining from festive demand (ahead of Diwali in November) and a favorable base effect. YTD FY19 production stands higher at 5.6% v/s 2.5% seen in April-October FY18. Mining, Manufacturing & Electricity grew 7%, 7.9% & 10.8% respectively. Primary goods gained 6% YoY while Capital goods came in at +16.8% (highest in 3 years). Intermediate goods (+1.8%) remained muted while Infrastructure goods (+8.7%) show consistent gains. Consumer durables improved substantially to +17.6% (highest in 3 years) while Non-durables improved to +7.9%. As per the latest RBI data, Forex reserves position improved to USD 393.29 Bn over the month. The Rupee depreciated

over the month closing at 69.818 Rs/USD vs. 69.675 Rs/USD last month.

### Sector-wise Performance

Key outperforming sector during the month was Financial Services. The outperformance of the sector was driven primarily by a revival in NBFCs which had been beaten down over the previous couple of months due to concerns of a liquidity squeeze in the system leading to fear that certain NBFCs might not be able to meet their short term debt obligations. These concerns also led to expectations that the cost of funds will rise significantly and many NBFCs and banks dependent of wholesale funding will not get capital for growth. However, no incidence of a default by any listed NBFC during the period led to these concerns subsiding. Also, inflation remaining low has given rise to expectations of a pause in rate hikes and a possibility of rate cuts. The expectation of stress on asset quality of corporate focused banks has also led to sentiment turning positive. We continue to remain positive on the sector with exposure to high quality private sector banks and NBFCs.

Key underperforming sector during the month was Healthcare. Stocks within the sector have underperformed for the second month in a row as concerns regarding high competition in the US market continue. Also, continued investment in R&D focused for the US market and costs incurred to establish marketing strength for the same are expected to impact the profitability and return on capital for US focused companies. However, we believe that these factors are largely transient in nature and unlikely to impact the long term growth potential. Price stability seems to be returning back to the US generics market which is positive for Indian companies as well. We remain positive on the sector's long term growth potential in both domestic as well as international markets

### Key Stock Movements

**Symphony Ltd – Symphony is a leading player in the Indian Air Cooler industry with a market share of ~50% within the organized segment. The industry has a long growth runway as penetration of air coolers is miniscule and the cost of ownership is substantially lower than ACs both at the time of purchase as well as running cost. The stock**

has been under pressure for some time due to two back to back poor summer seasons. We remain confident of the company's ability to grow ahead of the industry and gain market share driven by new product launches and focus on R&D and innovation.

**Page Industries Ltd – Page Industries is an exclusive licensee for Jockey innerwear in India, Srilanka, Bangladesh, Nepal and UAE. The stock has underperformed during the month post reporting muted volume growth in Q2FY19 (lowest growth in the past many quarters). This was on the back of above expectations growth and profitability in Q1. We see this as a minor hiccup in the long term growth potential for the company. We believe that Page Industries shall benefit from rising income levels and shift in consumer preference towards branded premium segment and focus on increasing penetration in women's wear and kid's wear. We remain positive on the company.**

### Market Outlook

While sentiment remained muted driven by the outcome of state elections and its implications on the General Elections next year, we maintain that election outcomes impact equity market only for a brief period and long term returns are dependent on fundamental factors. Short terms pressure points like sharp rise in crude oil prices and INR depreciation have also stabilized now. Earnings growth momentum had been muted over the last 3-4 years as capacity utilizations and fresh capital investment remained low, demonetization as well as GST implementation impacted economic growth, stressed assets in the banking system were high and domestic consumption remained the only steady driver of growth. However, as evident from the GDP data and corporate results over the last couple of quarter, growth momentum not just appears to picking up but is also more broad-based. While government driven investment remains robust, private sector participation has started to improve. Stress within banking sector seems to have peaked out providing gradual improvement in banks' Balance Sheets and their ability to provide growth capital. These factors provide confidence about the visibility of growth over the coming years. Post the recent correction in the market, valuations are now back to reasonable levels, especially within the mid cap space.
